DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 13-18 are rejected under 35 U.S.C. 102(a) as being anticipated by Jacobs (6,294,407). Jacob discloses a method for manufacturing a package for accommodating electronic parts, comprising the steps of: adhering a buildup substrate (Fig.1 el.140) having a power source and/or a ground layer formed on a core substrate, and signal lines formed on a buildup interconnecting layer to a stiffener (el.120) with a conductive adhesive layer (el.130,132; col.3 line 62 – col.4 line 4) using a conductive adhesive; and forming a grounding plane using said stiffener and said buildup substrate (col.6 lines 19-26); fixing said conductive adhesive layer at a grounding potential (Fig.1); providing a plurality of ground connecting pads (el.112a, 112b) on said buildup interconnecting layer; and connecting said conductive adhesive layer having mainly a conductive adhesive to said plurality of ground connecting pads (Fig.1); and providing pads connected to said grounding plane on the surface of said buildup substrate as well as electrically connecting (el.114) said pads to said conductive adhesive layer.
